ACTIVE GROWING TECHNOLOGY™

Effortless Indoor Gardening

TREGREN PROVIDES EFFORTLESS AND FLOURISHING INDOOR GARDENING.

Herbie is developed for easy indoor gardening and is already a true classic in its field. The Active Growing Technology, an integral part of Herbie, ensures that everyone can be a successful gardener without any prior experience.

The compact and contemporary design of Herbie and its user-friendly functionalities bring urban gardening to every home.

Fresh, Tasty and Ecological

THE ESSENCE OF ANY GOOD MEAL IS FRESH, HIGH QUALITY INGREDIENTS.

Greens such as lettuce, herbs, and vegetables can only be of the highest quality when they are fresh.

Additionally, local food production reduces remarkably our carbon footprint. These are some of the main reasons why urban gardening is a rapidly growing megatrend.

Food production is becoming local again, as the origin and purity of the food is becoming increasingly relevant. What would be more locally produced than the greens that you grow in your own home?

Herbie is the perfect solution for indoor gardening.

The Elegant Classic

HERBIE IS DESIGNED FOR A WIDE VARIETY OF PLANTS, FROM FLOWERS TO VEGGIES. THE ACTIVE GROWING TECHNOLOGY ENSURES THAT THE DIFFERENT TYPES OF PLANTS PROSPER WITHOUT EXTRA EFFORT FROM YOU.

Herbie is perfect as a kitchen garden as it fits up to six plants. The smart watering system and the specially design nutrients ensure a continuously high yield without any extra effort.

Herbie is designed to be used with herb pots bought from any grocery store or with plants grown elsewhere. You can fit pots with a diameter up to 11 cm in Herbie. Herbie is also suites well for growing your own plants from seeds in growing media.

Herbie Indoor Garden

HERBIE WITH ITS SIMPLISTIC DESIGN AND EASE OF USE HAS ALREADY BECOME A TRUE CLASSIC OF INDOOR GARDENS WITH OVER 20.000 PRODUCTS SOLD.

Herbie combines design and functionality in one solid product. Herbie fits 2-6 plants at a time. The highly developed Active Growing Technology guarantees a quick growth and a plentiful harvest. All this with less than 15 minutes of care taking per month and without need of previous experience.

GROWING LIGHT

The right lighting is crucial for all plants. The lamp in Herbie provides the optimal color temperature as well as the right color spectrum for plants.

We have also made sure that the energy consumption is low as we want to minimize the carbon foot print when using Herbie.

We offer a range of lamp shafts for different type of plants. The standard lamp shaft is 41 cm and is perfect for growing herbs and lettuce. The middle lamp shaft is 53 cm and is meant for tall herbs. The long lamp shaft is 68 cm and meant for chillies and tomatoes.

The lamp shafts are easy and quick to change as no tools are needed.

HERBIE Indoor Garden

HERBIE COMBINES SIMPLISTIC AESTHETICS AND CONVENIENT FUNCTIONALITY IN ONE SOLID PRODUCT. THE HIGHLY DEVELOPED ACTIVE GROWING TECHNOLOGY GUARANTEES QUICK GROWTH AND PLENTIFUL HARVEST.

ACTIVE GROWING TECHNOLOGY™

DEVELOPED BY TREGREN AND FAMILIAR FROM GREENHOUSES, ACTIVE GROWING TECHNOLOGY IS BASED ON ENHANCED HYDROPONICS.

The Active Growing Technology enables up to two times faster growth compared to traditional growing methods. Best of all, growing herbs, lettuce and plants is effortless and does not require previous experience.

A key component for effortless maintenance is the nutrients designed for indoor gardening. To make it easy we have created a nutrient that you add to the water every third week. The nutrient ensures that the water always has the correct nutrient balance for plants and you will get continuous yield month after month. Only 15 minutes of maintenance per month will ensure successful and enjoyable home growing.
